Aneej Ghimire

Chennai, India

aneej-ghimire | ghimireaneej07 | Portfolio | aneejghimire@gmail.com | +91-9360786253

SUMMARY

Software Engineering student with hands-on experience in MERN and Django, focused on building scalable web applications and RESTful APIs. Strong in Data Structures, backend architecture, and performance optimization. Proven ability to develop production-ready systems with authentication, role-based access, and efficient database design.

EXPERIENCE

Web Development Intern **Sep 2025 – Oct 2025**
Kathmandu, Nepal

- Engineered Job Bridge Nepal, a full-stack MERN job platform supporting role-based access for recruiters and job seekers
- Designed and implemented RESTful APIs (Node.js, Express) handling authentication, job postings, and applications
- Integrated secure authentication using JWT and middleware-based authorization, improving system security
- Optimized backend queries and API response time, enhancing performance and scalability
- Collaborated using Git workflows, debugging issues, and deploying applications on cloud platforms

EDUCATION

B.Tech Information Technology **2022 – 2026**
Jeppiaar Engineering College, Chennai CGPA: 8.0

Higher Secondary (Computer Science) **2020 – 2022**
Modern Public Secondary School CGPA: 7.5

SKILLS

Languages:	Python, JavaScript
Frontend:	HTML, CSS, JavaScript
Backend:	Django, Node.js, Express.js, REST APIs
Database:	MongoDB, SQL
Core Concepts:	Data Structures, Algorithms, OOP
Tools:	Git, GitHub, VS Code, Postman, Netlify, Vercel

PROJECTS

Job Bridge Nepal — Job Platform Live

- Developed scalable MERN application with authentication, dashboards, and role-based access control
- Built REST APIs supporting job posting, application tracking, and user management with secure endpoints
- Implemented MongoDB schema design and optimized queries for efficient data handling
- Deployed application using Vercel ensuring high availability and performance

Scrapay — Scrap Management System GitHub

- Designed backend system for scrap collection, vendor management, and request workflows
- Implemented transaction handling and data tracking for operational efficiency
- Reduced manual coordination by digitizing vendor communication and request processing
- Focused on modular backend architecture and scalable system design

Portfolio Website Live

- Built responsive portfolio using modern UI principles showcasing projects and skills
- Improved user engagement through optimized UI/UX and performance enhancements
- Deployed using Netlify with CI/CD integration via GitHub

CERTIFICATIONS

- Google AI Essentials — Google
- Generative AI for Software Development — IBM
- Django for Everybody — University of Michigan
- CCNA: Introduction to Networks — Cisco
